EDUCATION

GRD INSTITUTE OF MANAGEMENT AND TECHNOLOGY UTTARAKHAND *Dehradun, Uttarakhand*

Bachelor of Technology, Major in Computer Science and Engineering   *2018-2021*
- Graduated with first Class.

GOVERNMENT POLYTECHNIC PITHUWALA UTTARAKHAND *Dehradun, Uttarakhand*

Diploma in Engineering   *2015-2018*
- Graduated with first Class.

EXPERIENCE

Newtown Technologies Pvt. Ltd. (*Remote) Frontend Developer*   *July2022-May2023*
- Developed and maintained a robust online auction platform designed for conducting auctions of bankrupt factories, industries, and various properties. The platform provided a seamless and engaging user experience, enabling users to participate in live auctions, bid on properties, and manage their auction activities efficiently.

Phiof Services Pvt. Ltd. *(Self-funded Start-up) Noida, UP, India Web Developer*   *Jan2022-Jun2022*
- I worked in the development team as a Front-end developer, for a US-based client, holding the responsibility of adding new features and effectively executed three projects with on-time delivery while achieving a cost-reduction of 20%.

PROJECTS

OPEN-AI
- Designed and implemented a responsive web application using React.js, focusing on creating an intuitive user interface and seamless user experience. The project showcases proficiency in frontend development, including component architecture, state management, and responsive design principles.

BIDBOLI
- Developed a dynamic online auction website using React.js, allowing users to buy and sell various assets through an intuitive and responsive web interface. The application facilitates bidding processes, user authentication, and real-time updates on auction listings and bids.

BIDBOLI-Admin Panel
- Designed and implemented a responsive admin panel frontend using React.js for the Bidboli online auction platform. The admin panel provides administrators with intuitive interfaces to manage auction listings, user accounts, transactions, and content effectively. Emphasized on user experience and interface design to facilitate smooth navigation and efficient management of site operations.

Bumble Clone
- Developed a replica of the Bumble dating application using React.js for the frontend, featuring a complete integration of the Razor payment gateway for premium subscription services. The project included frontend development of user profiles, swiping functionality, messaging, and seamless payment processing for subscription upgrades.

The Sky Creation (Architectural firm Website)
- Independently developed a website for the local Architectural firm to increase its business and popularity by 40%.
